Lago Ta Yuda Exposicion di Arte Organiza pa Depto. di Cultura

Durante un conferencia di prensa dia 28 September, bao direccio di Hubert Boo, hefe di Departamento di Cultura y Educacion na Aruba, el a duna detaye di e Segundo Exposicion di Arte Popular. El a anuncia cu e anja aki e exhibicion di gobierno lo recibi ayudo di Lago.

Lago su Gerente di Relacion Publico, Oscar V. Antonette, a confirma na u conferencia aki cu pa motibo di e exito rotundo di e Promer Exhibicion di Arte Popular na November anja pasá, ta un placer pa Lago asisti. Lago lo pone na disposicion tres premio: promer premio di 500 florin, segundo premio di 250 florin y di tres premio di 150 florin. Fuera di esey, Lago lo yuda den e campania cu su facilidadnan di publicidad y tambe via programanan di radio y television.

E di dos Exposicion di Arte Popular lo worde habré Diasabra, dia 11 di November 5.30 atardi den Sociedad Bolivariana. Promer cu e apertura e steelband di Paradera "The Twink-

ling Stars" lo percura pa amenidad musical den e patio di Sociedad Bolivariana. Pa 5 or di atardi lo sigi un presentacion di ballet door di un grupo di Centro Cultural.

E exhibicion di arte lo keda habré tur dia entre 5 or di atardi y 10 or di anochi te na ultimo dia di e exhibicion, cu ta Dia-dumingo, 19 November 1972.

Anja pasá 309 obranan di arte a worde presentá door di 125 artista amateur, mientras cu tabatin mas cu 13.000 bishitante cu a mira e exhibicion durante e nuebe dia cu el a keda habré.

Tur obranan di arte ta worde aceptá, manera pintura, collage, obra di man, obra di borduur, escultura, obra cortá den madera y cosnan similar. Obranan cu a worde mandá anja pasá lo no worde aceptá trobe.

Esnan cu registra (fecha final pa registra ta Oct. 9) mester entrega nan obranan di arte entre 9 di October y 3 di November na Departamento di Cultura y Educacion na Plaza Irausquin.

Hubert Boo, head of the Department of Culture and Education in Aruba, discussing the progress of the 2nd Popular Art Exhibition. The press conference was attended by Lago's PR Manager O. V. Antonette and Communications head A. C. Eman.

Hubert Boo, hefe di Depto. di Cultura y Educacion na Aruba, discutiendo progreso di 2do Exposicion di Arte Popular. E conferencia di prensa a ser presencia pa Gerente di PR di Lago O. V. Antonette y Hefe di Comunicacion A. C. Eman.

Hydrodesulfurization Phase II Project To Expand Refining Control Center

The Refining Control Center is being expanded and remodeled as part of the HDS-II Project. A new two-story structure will be added to the existing control center to house the added equipment and personnel required by the HDS-II Project. The new addition will increase floor space from the current 8,000 square ft. to about 20,000 square feet.

The new section will contain a new General Electric DDC computer in its first floor, four new offices and new airconditioning equipment for the entire building. The second floor will be fitted with instrument control panels and will have two new offices, lunch and locker facilities, an instrument repair room, a new radio room and storage space.

The fully airconditioned building is pressurized in order to keep out dust and trace gases which are corrosive to computer components. A smoke detection system will also be installed to minimize the chance of a small fire going undetected.

Work began on March 13,

1972 with the excavation for foundations. Subcontractor Robert Nahar has already installed the steel structure and Elga is building the roof. The radio tower has been relocated by Industrial Instruments & Electrical Equipment (II&EE), which will also be responsible for installing and commissioning the new tower. The prime contractor, Arthur G. McKee, is coordinating the overall job.

The building required 250 cubic yards of concrete for foundations, 119 tons of steel for framework and about 20,000 concrete blocks for the walls.

The project will require over 55,000 manhours of McKee personnel and some 12,000 man-hours of construction forces of the subcontractors.

Lago's Project Group for the expansion project includes Wim Diaz as Maintenance & Construction Coordinator; Clyde Persons, as Instrumentation Project Engineer (Clyde is presently working in the main contractor's office in Cleveland); Ken Oliver, as Civil Project Engin-

Proyecto Desulfurador Fase II Ta Expande Refining Control Center

Actualmente compania ta haciendo Centro di Control di Refinacion mas grandi, y lo e worde remodelá como parti di Proyecto HDS-II. Un edificio di dos piso lo worde trahá pegá na e centro di control na uso awor, pa tin lugar pa mas equipo y trahador cu ta necesario pa Proyecto HDS-II. E construcion nobo lo aumenta e espacio di vloer actual di 8,000 pia cuadrá te mas of menos 20,000 pia cuadrá.

E seccion nobo lo contene un computer nobo General Electric tipo DDC den e promer piso, cuater oficina nobo y equipo di aircondition pa henter e edificio. Den di dos piso lo tin instrumentonan di control, mas dos oficina nobo, facilidadnan pa come y warda panja, y un cuarto pa drecha instrumentonan, un cuarto nobo pa radio y lugar di warda equipo.

E edificio completamente airecondicioná lo ta bao presion di aire, pa tene afor stof y posible gas cual por afecta partinan di e computer. Un sistema pa descubri huma di candela lo worde instalá tambe pa asina reduci e posibilidad di un candela cu hende no ta mira.

Trabao a cuminza dia 13 di Maart 1972 cu cobamento di

fundeshi. Subcontratista Robert Nahar ya a construi e parti di staal y Elga ta trahando su dak. E toren di radio a worde poní na un otro sitio door di Industrial Instruments & Electrical Equipment (II&EE) y e mes compania ey lo instala y pone ■ toren nobo na uso. E principal contratista, Arthur G. McKee, ta coordina henter e obra.

E construcion ta requeri 250 yarda cubico di concreto pa fundeshi, 119 ton di staal pa curpa di e edificio y 20,000 blokki di cement pa murayanan.

E projecto lo tuma mas cu 55,000 ora di trahador di empleaseonan di McKee y 12,000 ora di trahador di empleacionan di subcontractistanan.

Lago su Grupo di Proyecto pa e proyecto di expansion ta inclui Wim Diaz como Coordinador di Mantencion y Construcion; Clyde Persons como ingeniero di Proyecto di Instrumentacion (awor aki Clyde ta trahando den oficina di e contratista principal na Cleveland); Ken Oliver como Ingeniero Civil di Projecto (e tambe ta na Cleveland); George Stankiewicz como Planeador di Instrumento; y Blaine Nelson como Ingeniero pa Computer. Lago Assists in Art Exhibition Organized by Department of Culture

During a press conference on September 28 under direction of Hubert Boo, head of the Department of Culture & Education in Aruba, he discussed the Second Popular Art Exhibition. He announced that this year the government art exhibition will receive assistance from Lago.

Lago's PR Manager Oscar V. Antonette confirmed at this conference that in view of the resounding success of the first Popular Art Exhibition in November last year, Lago is pleased to assist. Lago will make three prizes available: First Prize - Fls. 500; Second Prize - Fls. 250; and Third Prize - Fls. 150. In addition, Lago will help in the publicity campaign through its publicity media and via its radio and television programs.

The 2nd Popular Art Exhibition will be inaugurated on Saturday, November 11, at 5:30 p.m. in Sociedad Bolivariana. Prior to the opening, the Paradera steelband "The Twinkling Stars" will provide musical en-

tertainment in the patio of Sociedad Bolivariana. This will be followed by a performance at 5 p.m. by the ballet group of the Cultural Center of Aruba.

The art exhibition will remain open every day between 5 and 10 p.m. until the last day of the exhibition on Sunday, November 19, 1972.

Last year some 309 works of art were turned in by 125 amateur artists, while over 13,000 visitors saw the exhibition during the nine days of public display.

All works of art are accepted, such as paintings, drawings, collages, handicrafts, needlecrafts, sculptures, carvings and the like. Entries submitted in last year's exhibition will not be accepted.

Those who have registered (deadline is Oct. 9) should turn in their works of art between October 9 and November 3 to the Department of Culture and Education in Irausquin Plaza, Oranjestad.

Expansion of the Refining Control Center will more than double the capacity of the existing building (section at far left).

Expansion di e Refining Control Center lo mas cu redobla e capacidad di e edificio actual, e parti na robez.

Refining Control Center nobo manera e lo bira, cu e edificio manera ■ tabata, na drechi.

30-Year Service Awards - September 1972

Fabian S. Francis of Industrial Relations Department originally joined Lago in 1942 as a Process Helper D in the Hydro-Poly Plant. In 1944 he became Levelman. Later on he worked briefly in the Catalytic Plant before transferring to Personnel Department as a Training Instructor in 1946. In 1952 this title was changed to Senior Instructor in the Industrial Relations Department where he later became Training Coordinator.

Mr. Francis advanced to

Training Adviser in 1965, and subsequently worked as Section Head in I.R. until 1967 when he resumed the position of Training Adviser in the Public & Industrial Relations Department.

A next promotion — in 1969 — made him Public & Industrial Relations Administrator in PR/IR Department. Mr. Francis, who was named Manager of the Industrial Relations Department in July this year, completed his 30th service anniversary on September 28.

Fabian S. Francis di Industrial Relations Department originalmente a cuminza na Lago na 1942 como Process Helper D den Hydro-Poly Plant. Na 1944 el a bira Levelman. Despues el a traha corto tempo den Catalytic Plant promer cu el a transferi pa Personnel Department como un Instructor di Entrenamiento na 1946. Na 1952 e titulo aki a ser cambiá pa Senior Instructor den Industrial Relations Department caminda el a bira Coordinador di Entrenamiento mas despues.

Sr. Francis a avanza pa

Consejero di Entrenamiento na 1965, y despues el a traha como Hefe di Sección den I.R. te na 1967 ora cu el resumi e puesto di Consejero di Entrenamiento den Public & Industrial Relations Department.

Un proximo promocion — na 1969 — a hacile Administrador di Public & Industrial Relations den P.R./I.R. Department. Sr. Francis, kende a ser nombrá Gerente di Industrial Relations Department na Juli e anja aki, a completa su di 30 aniversario di servicio arriba September 28.

Un aparato cu substancia quimica ia ser usa aki door di Ireno Rasmijn di Mechanical-Shops pa protehele di gas di verf durante sputimento di verf.

Seferino Ridderstaap, Fireman employee wearing apparatus emergency

Employees Are Assured to Breathe Clean Air When Using Respiratory Protective Equipment

Some operations in industry, and specifically in the oil industry, may contaminate the air we breathe. This can happen through accidental releases of noxious or nuisance dusts, corrosive vapors, or toxic fumes and vapors. However, there are several pieces of equipment specially designed to protect employees' health against the effects of these releases.

The following types of respiratory protective equipment are made available here at Lago to safeguard our employees' health. Each has its specific purpose and limitations.

Canister-Type Gas Masks

This equipment does not supply fresh air. It only absorbs the gases which may have been mixed with the air. It draws the gas through a container — a canister — which is filled with a chemical. This type should be used only in areas with low concentrations of gas, a maximum of 25% in volume. It should not be used in oxygen deficient atmosphere. After two hours continuous use the chemical is deactivated, the canister gets hot and should be replaced.

Fresh Air Hose Masks

Fresh air hose masks must be used where it is necessary to

enter enclosed areas or spaces with heavy smoke, oxygen deficiency, inside a vessel which has contained toxic products and for sandblasting. The equipment consists of an electric or hand-driven air blower with the necessary hoses and face masks. A life line must be attached to the hose mask harness.

Chemical Cartridge Respirator

There are two types of cartridges in use at Lago. The black cartridge which contains activated charcoal and protects against organic vapors, T.E.L., gasoline, etc. The yellow cartridge contains activated charcoal and soda lime and protects against acid gases, organic vapors and also smoke.

This type of respirator may be used for all operations where annoying or irritating gases or fumes may be present in such small quantities (up to 0.2% in volume) that the canister gas mask is not needed, such as spray painting. It is recommended for use only for exposure to gases which are not ordinarily considered harmful or are not present in harmful concentrations. It is also used where there is a nuisance of dust in the air, such as vanadium ash, cement, sulphur, PCAR catalyst or any other non-toxic dust.

Self-Contained Breathing Apparatus

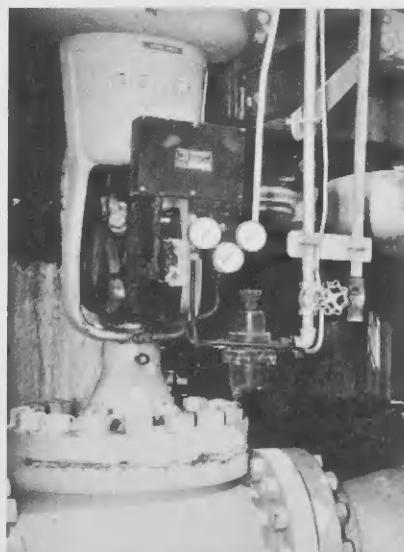

Lago has two types of this breathing apparatus. One is the Scott-Air-Pak unit, which gives 30 minutes of air supply. The other one is a smaller type which provides only 15 minutes of air supply.

This self-contained breathing apparatus is a standard fresh air mask with air supply from a high pressure cylinder. It is to be used for work of a special nature where a gas hazard or lack of oxygen exists or may exist and also to supplement oxygen masks during emergencies. This equipment is supplied to all process units for emergency use only. They are also available at the Central Tool Room.

Maintenance is Essential

One important factor should never be overlooked. All protective equipment should at all times be in proper operation condition, ready for use. Therefore, they should be given proper maintenance, and their life limitation should be checked regularly.

When in doubt, employees should take no chances, but use a gas mask. It is imperative to use the right mask for the right job.

ing equipment for possible defects. the Central Tool Room.

equipo de respiracion pa posible fallos en la Central Tool Room.

Empleadonan Ta Sigur di Respira Aire Limpi Ora Nan Ta Usa Equiponan Protectivo pa Hala Rosea

Algun trabao den industria, y especificamente den industria petrolero, por susa e aire cu nos ta respira. Esey por socede door di e escape accidental di dampnan of stof cu ta molestia hende y cu ta corrosivo of venenoso. Sinembargo, tin varios pieza di equipo cu ta trahá especialmente pa proteha salud di empleadonan contra efectonan di e escape di dampnan den aire.

E siguiente tiponan di equipo protectivo pa hala rosea ta disponible aki na Lago, pa proteha e salud di empleadonan. Cada un tin su mes proposito y limitacionnan.

Mascara di Gas Tipo Canister

E equipo aki no ta duna aire fresco. E ta absorbe solamente gasnan cu por a mezcla cu aire. E ta hala e gas door di un bleki cu ta jená cu un substancia quimica. E tipo aki mester worde usá solamente den lugarnan cu tin concentracion abao di gas, (no mas cu 2% pa volumen). E no mester worde usá den lugarnan cu tin poco oxigeno. Despues di dos ora di uso continuo, e substancia quimica ta perde su actividad, e bleki ta bira cayente y mester cambiele.

Mascara pa Aire Fresco

Mester usa mascara pa aire fresco caminda ta necesario pa drenta lugarnan of espacionan cerá, caminda tin huma denso,

falta di oxigeno, den un columna cu tabatin aden productonan venenoso, of pa suplemento cu suntu. E equipo ta consisti di un suplidor electrico di aire of uno cu ta drei cu man, cu slangnan y mascaranan necesario. Ta necesario pa mara un cabuya di salbamento na e mascara aki.

Aparato pa Hala Rosea cu Bleki di Substancia Quimica

Lago ta usa dos tipo di e blekinan cu substancia quimica. E bleki preto ta contene carbon activá y ta protehe e trahador contra dampnan organico, chumbo, tetra etilico, gasolin, etc. E bleki geel tin aden carbon activá y kalki, y ta protehá trahardonan contra dampnan acido, dampnan organico y tambe huma.

E tipo di aparato aki pa hala rosea por worde usá pa tur operacionnan caminda por tin gasnan of dampnan cu ta irritante den cantidadnan chiquito (te 0.2% na volumen) caminda e mascara cu bleki di substancia quimica no ta necesario, manera pa spuitmento cu verf. Compania ta recomenda su uso solamente ora empleado ta exponí na gasnan cu generalmente no ta considerá como venenoso y cu no ta presente den concentracionnan cu por causa danjo. E ta worde usá tambe caminda stof den aire ta desagradable pa e trahador, tal manera shinishi di vanadio, ce-

ment, zwavel, catalista di PCAR of otro stof cu no ta venenoso. Aparato Completo pa Hala Rosea

Lago tin dos tipo di e aparato aki pa empleadonan hala rosea. Un di nan jama e unidad Scott-Air-Pak, cu ta duna 30 minuut di aire. E otro ta e tipo mas chiquito cu ta duna solamente 15 minuut di aire. E aparato completo aki ta un mascara regular pa aire fresco, caminda aire ta bini for di un cilindro di aire comprimi. E mester worde usá pa trabao di naturaleza especial, caminda tin of por tin peliger di gas of falta di oxigeno, y tambe pa percura pa mas oxigeno durante emergencia. Tal equipo ta worde entregá na tur unidadnan di proceso pa uso di emergencia solamente. Tambe nan ta obtenible na Central Tool Room.

Mencion ta Esencial

Un factor importante nunca mester worde perdi di bista. Tur equipo pa proteccion di trahardonan mester ta tur ora bai den condicion cu por usé inmediatamente. Pesey, ta necesario pa mantene e equipo na bon condicion, y mester check regularmente tambe si ainda nan ta sirbi.

Den caso di duda, empleadonan no mester tuma ningun riscu, pero usa un mascara di gas. Ta necesario tambe pa usa e mascara corecto pa e trabao en particular.

Dodge Team Wins ARBAS Tournament Trophies Go to Winners Sept. 16

The annual Aruba Bowling Association Tournament got off to a start on July 14 at the Esso Club, Caribe Club and Tivoli Club lanes. A total of fourteen teams, with five players to a team, took part in the matches which were held during seven consecutive weeks.

The games, which began at 8 p.m., were held simultaneously at the three club lanes on Tuesdays and Fridays. The teams participating in the tournament were sponsored by: Dodge, Mansur Department Store, Marlboro, Banco Popular Antillano, Mario S. Arends, White Label, Budweiser, Algemene Bank Nederland, Aruba Hard-

ware C.V., Granville, Jantzen, 100 Pipers, Baby Bakery and Libby's.

On Friday, September 1, the tournament ended with the Dodge team winning the championship with 39½ points. The Mansur Dept. Store team became sub-champion with 35 points, while Banco Popular Antillano came out in the third place with 32 points.

During a dance at the Esso Club on September 16, the ARBAS trophies were presented to the winning teams. Eighteen bowlers were awarded individual trophies for high average, best series and high game in the A, B, and C categories.

Team representatives and individual winners with trophies are here al rear (l to r): Jacobo Arends (Mansur Dept. Store), Carmen de Cuba (Dodge), Gladys Arends (Mansur), Olga Barbour (Jantzen), Richard Lopez-Henriquez (Marlboro), Dulfo Geerman (Budweiser), Roro Hernandez (Banco Popular Antillano), Pat Landree (Granville). Kneeling are: Carlos de Cuba (Dodge) and Corry Hart (100 Pipers).

Dodge Team Ta Gana Torneo ARBAS; Ganadornan Ta Haya Trofeo Sept. 16

E Torneo Anual di Aruba Bowling Association a cumenza Juli 14 ariba canchanan di Esso Club, Caribe Club y Tivoli Club. Un total di diezcuatro team, cu cinco hungador den cada team, n tuma parti den n weganan cual a ser tení ariba siete siman consecutivo.

E weganan, cual tabata cumenza pa 8 p.m., a ser tení simultaneamente ariba e canchanan di e tres clubnan ariba Diabiera y Diabiera. E teamnan cu

Jacobo and Gladys Arends receive sub-champion trophy on behalf of Mansur Department Store team.

Jacobo y Gladys Arends n recibí trofeo di sub-campeon na nomber di team di Mansur Department Store.

ARBAS president Carlos de Cuba (2nd l) and board members Corry Hart, Adriaan Arends and Carlos Croes pause here during the party to present trophies to the winning teams and 18 individual winners. President di ARBAS Carlos de Cuba (di dos na robez) y miembronan Corry Hart, Adriaan Arends y Carlos Croes ta aki durante fiesta di Esso Club pa presenta premionan na team y 18 ganador individual.

Dodge team bowlers Mrs. Carmen de Cuba, Mr. and Mrs. Rufo de Mey, Mr. and Mrs. Romero Tackling and team captain Carlos de Cuba with the trophy they won n champion in the 1972 Aruba Bowling Association Tournament.

Aki riba ta e team di Dodge cu e trofeonan, cu nan a gana.

a participa den e torneo tabata patrociná door di: Dodge, Mansur Department Store, Marlboro, Banco Popular Antillano, Mario S. Arends, White Label, Budweiser, Algemene Bank Nederland, Aruba Hardware C.V., Granville, Jantzen, 100 Pipers, Baby Bakery y Libby's.

Ariba Diabiera, September 1, e torneo a termina cu Dodge team ganando e campeonato cu 39½ punta. Mansur Trading Company team a resulta sub-campeon cu 35 punta, mientras cu Banco Popular Antillano a sali na di tres lugar cu 32 punta.

Durante un baile na Esso Club ariba September 16, e trofeonan di ARBAS a ser presentá na e teamnan ganador. Diezochio hungador a recibi trofeo individual pa averahe halto, mejor serie y mejor wega den categorianan A, B, y C.

Industrial Electronics Course Continues with Practical Lab Work

The Industrial Electronics and Automation Course being conducted for twenty-five Instrument, Electrical and Engineering employees is progressing with practical lab work. The 10-month course, which began in April this year, is from the Cleveland Institute of Electronics and is given in the Administration Building. Instructor for the 3-hour morning session to twelve employees and the 3-hour afternoon session to thirteen men is Hieronimo (Ro) Amaya.

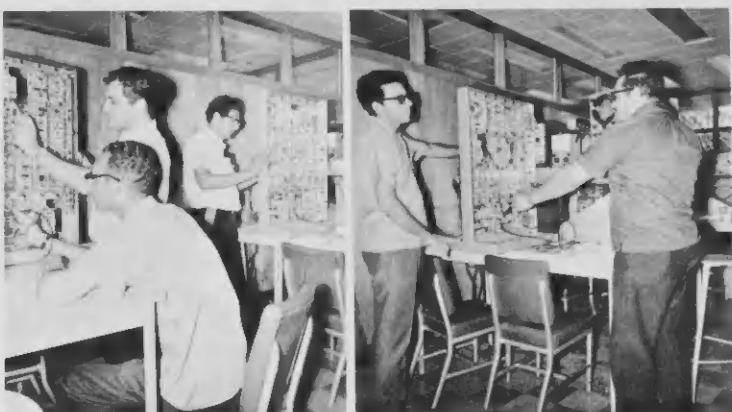

The course includes 58 les-

sions on subjects such as Electricity, Measuring and Measuring Instruments and Techniques, Systematic Troubleshooting, Algebra, Logarithm, Trigonometry, Computer Arithmetic, Analog Computers, and Telemetry.

The group has already completed twenty-nine lessons, with most of the grades being A's or B's. The course includes many phases of troubleshooting work on which the students practice, as shown in the pictures on this page.

Course participants (in left picture, l to r) Victoriano Tromp, Guillermo Arends and Nercisio Krosendijk, with Ronald Roga and Edgard Gario, in picture at right.

Students Martinus Britten (left, standing), G. Montesant (sitting), and Ferdinand Lo-Fo-Sang (at right, in left picture) and Damaso Dijkhoff with Gerardo Nicolaas (at right, in picture at right), during troubleshooting on plug-in modules.

Curso di Electronica Industrial Ta Sigui cu Entrenamiento Practico

E Curso di Electronica Industrial y Automatizacion cu ta ser conduci pa binti-cinco empleado di Instrument, Electrical y Engineering ta progresando cu entrenamiento practico den klas. E curso di 10 luna, cual a principia na April e anja aki, ta ser tumá for di Cleveland Institute of Electronics y ta ser duná den Edificio di Administracion. Instructor pa e lesnan di 3 ora mainta pa 12 empleado y 3 ora di les tramerdia pa dieztres empleado ta Hieronimo (Ro) Amaya.

E curso ta inclui 58 les ariba

topicinan manera Electricidad, Midimento y Instrumentos y Sistema Tecnico di Midimento, Averiguacion Sistematico di Fatos, Algebra, Logarithm, Trigonometria, Aritmetica di Computador, Computador Analogo, y Telemetria.

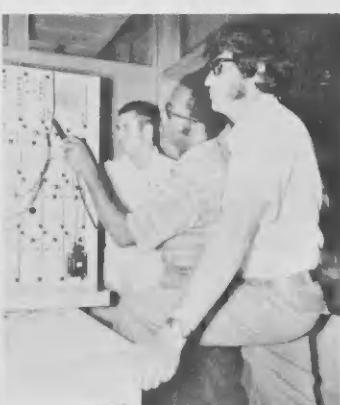

E grupo ya a termina bintineueles, mientras mayoria di nan gradonan tabata A of B. E curso ta inclui hopi fasenan di trabao pa averigua fayonan ariba cual e estudiantenan ta practica, manera munstrá den e portretnan ariba e pagina aki.

At their work table are here (left picture, l to r): Franklin Bardouille, Aubrey Leslie, and Gregory Fong-A-Fat. In picture at right are Donald Luydens and Ernesto Williams.

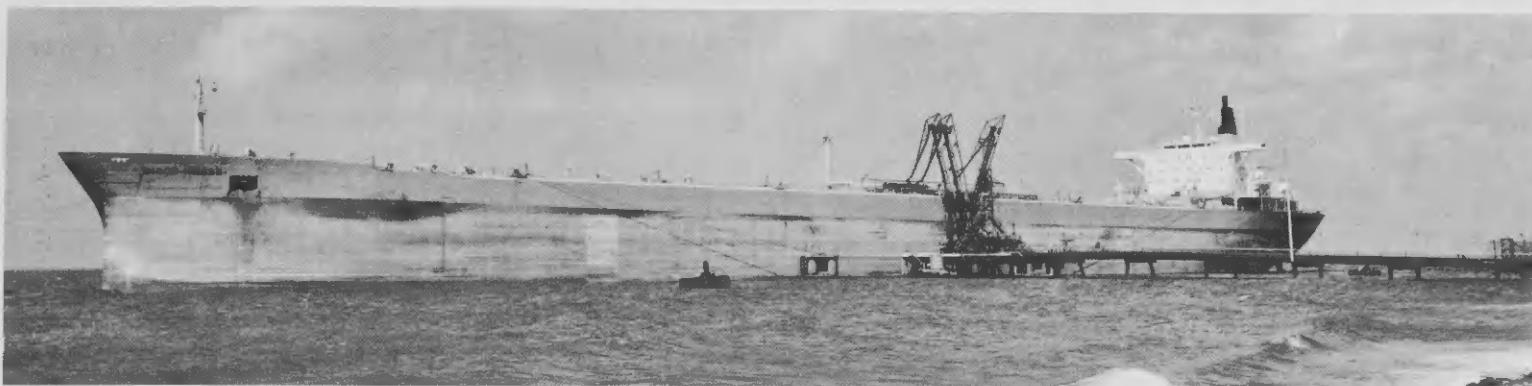

Course instructor for the Industrial Electronics course is Ro Amaya (3rd from left). Participants not in the above pictures are: Emeterio Arends, Max Fingal, Isaac Wever and Wim Diaz.

In left picture (l to r): Pedro Geerman, Arturo Idigoras-Cotarelo, and Cayetano Maduro. In picture at right: Everardo de Cuba, Robert Dellimore, and Rudolf Koolman.

Instructor pa e Curso di Electronica Industrial ta Ro Amaya (tercer di robez). Participantes di e curso cu no ta inclui den e portretnan aki riba ta: Emeterio Arends, Max Fingal, Isaac Wever y Wim Diaz.

The largest tanker to dock at Lago's Seaberth and in the Antilles is this 205,600 dwt. Danish tanker "Dirch Maersk". The 1080 ft. long and 144 ft. wide tanker has a draft of nearly 65 ft. and a capacity of approximately 1.5 million barrels. She was assisted by four tugs when mooring on September 21.

E tankero mas grandi pa traca na Lago su Seaberth y den Antillas ta e tankero Danes aki di 205,600 ton "Dirch Maersk". E tin 1080 pia largo, 144 pia hancho y un calado di casi 65 pia y un capacidad di como 1.5 million bariil. Durante tracamento ariba September 21, el a ser asisti pa cuatro remolcador.

Fire Training Is Resumed at the Relocated Fire Training Ground

Last week Monday, eight-hour courses for employees began at the Fire Training Ground. The new location of the training facilities is on the former Lago dump site on the sea side near the west entrance to the San Nicolas Harbor.

The new Fire Training area includes all the equipment and facilities of the former training ground.

The course is presently being conducted by Acting Fire Chief

Jimmy Biggs of Creole's Amuay Refinery, who is replacing Fire Chief Peter Storey during the latter's vacation. Mr. Biggs is Fire Section Supervisor in Amuay's Industrial Services Department.

Some 300 employees will participate in this fire training program. The course will be given on Mondays, Tuesdays and Wednesdays through October and November.

Relocated Fire Training Ground

Acting Fire Chief Jimmy Biggs gives basic firefighting theory to one of the classes.

Hefe Interino di Bomberos Jimmy Biggs ta duna teoria basico na uno di e klasnan.
